Education

Bachelor of Engineering (Artificial Intelligence & Machine Learning)

2023 – 2027

BMS Institute of Technology & Management

CGPA: 8.10 / 10.0

Work Experience

HEProAI

Feb 2026 – Mar 2026

AI & Machine Learning Intern

- Developed AI-driven student analytics and recommendation models using Python, Pandas, NumPy, and Scikit-learn to support academic performance and personalized mentoring.
- Built predictive scoring frameworks for academic performance, wellness, productivity, and career readiness using data-driven machine learning techniques.

Bluestock Fintech

Apr 2026 – May 2026

Data Analyst Intern

- Analyzed financial datasets using Python, SQL, Pandas, and Excel to generate business insights and automate reporting workflows.
- Created interactive reports and visualizations to identify trends, improve decision-making, and optimize business performance.

Projects

AI-Powered Comprehension Learning System | *Python, FastAPI, React, LangChain, Pinecone, RAG*

- Built an AI-powered adaptive learning platform using Retrieval-Augmented Generation (RAG) to generate personalized explanations from voice and text responses.
- Integrated LLM-based learning workflows with semantic retrieval to provide context-aware and personalized educational content.

NeighborNode – Secure Geofenced Community Platform | *Flask, React, Next.js, SQLAlchemy, SQLite*

- Built a secure multi-tenant community management platform with GPS-based geofencing and role-based access control.
- Developed backend APIs and responsive frontend components for secure community management and location-aware access.

DocInsight AI – RAG Chatbot | *Python, FastAPI, React, LangChain, FAISS, Pinecone*

- Developed a semantic PDF search chatbot using Retrieval-Augmented Generation for intelligent document querying and contextual responses.
- Integrated vector databases and OpenAI APIs to enable efficient document retrieval and natural-language interaction.

Skills

Programming Languages:	Python, C, SQL, JavaScript, HTML, CSS
AI/ML & Frameworks:	PyTorch, TensorFlow, Scikit-learn
Data & Databases:	Pandas, NumPy, SQL, NeonDB, Pinecone, FAISS
Web Development:	React, Next.js, JavaScript, HTML, CSS, APIs, Flask
Developer Tools:	Git, GitHub, Docker, Vercel, Jupyter Notebook
Core Concepts:	DSA, DBMS, Software Engineering, Agentic AI, Cloud

Certifications

- Python Fundamentals
- Generative AI Models and Tools
- Machine Learning and Data Science with AWS
- Cyber Security and Data Analytics
